Positioning System

SCU-VAC/VAC1

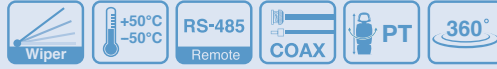

The SCU-VAC and SCU-VAC1 are integrated positioning systems that accept various camera/lens combinations to provide high speed pan & tilt. They offer continuous 360° rotation with an extended -85° to 40° tilt range. Internal positioning encoders allow for all 255 prepositions to be accurate within 0.1° even in high wind/vibration environments. These units are rated for weatherproof protection (IP 66) and have an operating temperature range of -58° to 122°F (-50° to 50°C), making them an ideal solution for demanding outdoor applications such as traffic or critical infrastructure.

- Integrated Receiver, Pan/ Tilt, and Housing
- Position encoders for absolute positioning
- 360° Continuous Pan Rotation
- Tilt Range of +40° to -85°
- Accepts most 24VAC 3rd party Cameras
- Wiper included
